Re:

NESHAP Semiannual Report for 59-0061 Calsonic Kansei North America, Inc. 201 Garrett Parkway, Lewisburg, TN Title V Permit #563336, Report Log #18032

Dear Mr. Murphree:

Calsonic's NESHAP (40 CFR 63, Subpart PPPP) semiannual report for the period from April 1, 2014, to September 30, 2014, was received on November 25, 2014. The NESHAP report has been examined for adequacy. A determination has been made that the content of the NESHAP report is adequate. If you have any questions concerning this correspondence, please contact Mark Reynolds at (615) 532-0559 or at mark.a.reynolds@tn.gov.

Sincerely,

for John Fuss, Section Manager

West Tennessee Permit Program

Randall Thomps

Synopsis:

• This review by the Division's West TN Permit Program is limited to the conditions of Title V Permit #563336 that pertain to the NESHAP (40 CFR 63, Subpart PPPP). This review includes Condition E4-1. The Title V semiannual report will be reviewed by the Columbia EFO.

General Requirements

- Condition E2. The report was due on November 29, 2014 (which is 60 days after the close of the period). The report was received by TAPCD on November 25, 3014. Thus, the report was received on time.
- Condition B4. The report was certified by the responsible official.

40 CFR 63, Subpart PPPP

- Condition E4-1. TPO (thermoplastic olefin) coating limit of 0.26 lb HAP per lb of coating solids during each 12-month period. The records showed compliance with this limit. During this reporting period, the highest total was 0.03 lb HAP/lb solids.
- The NESHAP (40 CFR 63, Subpart PPPP) semiannual report was adequate.
